

Description

The TD827 series provide two channel operation, and each combines an AlGaAs infrared emitting diode as the emitter which is optically coupled to a silicon planar phototransistor detector in a plastic DIP8 package with different lead forming options.

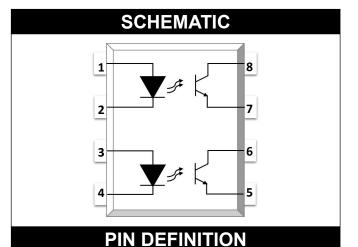

With the robust coplanar double mold structure, TD827 series provide the most stable isolation feature.

Features

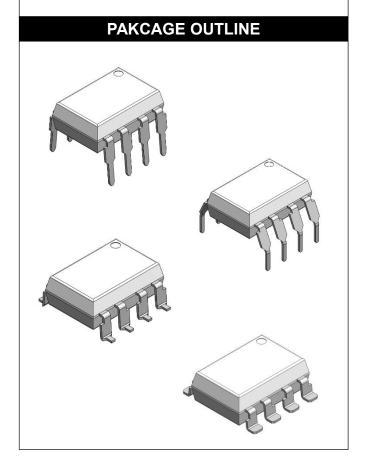

- High isolation 5000 VRMS
- DC input with transistor output
- Operating temperature range 55 °C to 110 °C
- REACH compliance
- Halogen free (Optional)
- MSL class 1
- Regulatory Approvals
 - UL UL1577
 - VDE EN60747-5-5(VDE0884-5)
 - CQC GB4943.1, GB8898
 - cUL- CSA Component Acceptance
 Service Notice No. 5A

Applications

- Computer peripheral interface
- Microprocessor system interface

- 1. Anode
- 8. Collector
- 2. Cathode
- 7. Emitter
- 3. Anode
- 6. Collector
- 4. Cathode
- 5. Emitter

Ramp-down Rate (TP to TL)	6°C/second max	6°C/second max
Time 25°C to Peak Temperature	6 minutes max.	8 minutes max.

- One time soldering is recommended for all soldering method.
- Do not solder more than three times for IR reflow soldering.

DISCLAIMER

- LIGHTNING is continually improving the quality, reliability, function and design. LIGHTNING
 reserves the right to make changes without further notices.
- The characteristic curves shown in this datasheet are representing typical performance which are not guaranteed.
- LIGHTNING makes no warranty, representation or guarantee regarding the suitability of the products
 for any particular purpose or the continuing production of any product. To the maximum extent
 permitted by applicable law, LIGHTNING disclaims (a) any and all liability arising out of the
 application or use of any product, (b) any and all liability, including without limitation special,
 consequential or incidental damages, and (c) any and all implied warranties, including warranties of
 fitness for particular
- The products shown in this publication are designed for the general use in electronic applications such as office automation, equipment, communications devices, audio/visual equipment, electrical application and instrumentation purpose, non-infringement and merchantability.
- This product is not intended to be used for military, aircraft, automotive, medical, life sustaining or lifesaving applications or any other application which can result in human injury or death.
- Please contact LIGHTNING sales agent for special application request.
- Immerge unit's body in solder paste is not recommended.
- Parameters provided in datasheets may vary in different applications and performance may vary
 over time. All operating parameters, including typical parameters, must be validated in each
 customer application by the customer's technical experts. Product specifications do not expand or
 otherwise modify LIGHTNING's terms and conditions of purchase, including but not limited to the
 warranty expressed therein.
- Discoloration might be occurred on the package surface after soldering, reflow or long-time use. It neither impacts the performance nor reliability.
